

Youssef Hadjkacem

✉ youssefhadjkacem11@gmail.com [in](#) LinkedIn [GitHub](#)

Final-year computer engineering student at ENSI, specialized in applied data science (EDA, NLP, time series). Deployed a data pipeline to production on AWS. Seeking a 4-to-6-month Data Science internship.

Education

National School of Computer Science (ENSI) Engineering Degree – Computer Science (<i>Final Year</i>)	Sept. 2024 – 2027 Tunis, Tunisia
Faculty of Sciences of Sfax Preparatory Classes – Mathematics (Rank: 110/1800)	June 2022 – June 2024 Sfax, Tunisia

Professional Experience

Data/AI Intern June 2026 – August 2026	Yonnov'IA Remote, France
– Sales teams lacked a reliable tool to generate quotes ; AI copilot leveraging sales history and CRM data, exposed via FastAPI REST API and deployed on AWS (EC2, S3, IAM). – Technologies: Python, NLP, Machine Learning, FastAPI, AWS	
AI Intern, Biomechanics & Exoskeleton June 2026 – August 2026	University of Lorraine Remote, France
– A reinforcement-learning exoskeleton controller needs a faithful biomechanical model ; 3D digital twin (Blender) from monocular motion capture, musculoskeletal analysis in OpenSim, preparing MuJoCo/MyoSuite integration via isolated Docker environments. – Technologies: Python, Blender, OpenSim, MuJoCo, MyoSuite, Docker	
Software Engineering Intern June 2025 – August 2025	Fogits Sfax, Tunisia
– Manually entering LinkedIn leads was slow and error-prone ; ETL pipeline (Selenium + BeautifulSoup) processing 800+ profiles, loaded into PostgreSQL (-85% manual entry). – Technologies: Python, Selenium, PostgreSQL, ETL	

Projects

AI Emergency Savior 🧠

- Recommending an emergency care provider requires balancing real-time constraints ; **NLP pipeline (Whisper)** for **voice symptom classification** (ICD-10/SNOMED CT) and **multi-objective optimization (NSGA-II)**.
- **Technologies:** Python, NLP, NSGA-II, FastAPI, Whisper, Transformers

GenAI Pipeline & Industrial RAG System 🧠

- Reliably answering business questions requires real sources ; **data cleaning pipeline** and **RAG (FAISS)** evaluated via an automated **LLM-as-judge** protocol.
- **Technologies:** Python, FAISS, Django REST, NLP

Sales Forecasting with Time Series

- Anticipating demand requires capturing **trend and seasonality** ; **EDA** and **time series modeling (Prophet)**, evaluated via **MAE/RMSE**.
- **Technologies:** Pandas, Prophet, Data Visualization

Technical Skills

Languages: Python, SQL, C, C++, Java	Databases: PostgreSQL, MongoDB, NoSQL, Odoo/CRM
Data Analysis: Pandas, NumPy, EDA, Feature Engineering	Machine Learning: Scikit-learn, TensorFlow, PyTorch, NLP
Statistics: A/B Testing, Hypothesis Testing	Cloud: AWS (EC2, S3, IAM)
Data Visualization: Seaborn, Power BI	Tools: Git, Docker, Jupyter

Languages

Arabic: Native	English: C1	French: B2
----------------	-------------	------------

Leadership & Volunteering

ENSI Junior Enterprise (EJE) – International Relations Officer	Tunis, Tunisia
AIESEC – Python Teacher	Târgu Jiu, Romania
AIESEC – English Teacher	Gaziantep, Turkey
