## Projects

### AI Emergency Savior 🧠

- Recommending an emergency care provider requires balancing real-time constraints ; **NLP pipeline (Whisper)** for **voice symptom classification** (ICD-10/SNOMED CT) and **multi-objective optimization (NSGA-II)**.
- **Technologies:** Python, NLP, NSGA-II, FastAPI, Whisper, Transformers

### GenAI Pipeline & Industrial RAG System 🧠

- Reliably answering business questions requires real sources ; **data cleaning pipeline** and **RAG (FAISS)** evaluated via an automated **LLM-as-judge** protocol.
- **Technologies:** Python, FAISS, Django REST, NLP

### Sales Forecasting with Time Series

- Anticipating demand requires capturing **trend and seasonality** ; **EDA** and **time series modeling (Prophet)**, evaluated via **MAE/RMSE**.
- **Technologies:** Pandas, Prophet, Data Visualization

## Technical Skills
